WFC POLICY STATEMENT

Non-Interference and Respect for National Authority

Approved by the Council of the World Federation of Chiropractic

September 1999

Whereas chiropractic developments in one country may significantly influence neighbouring countries;

And whereas in countries without an established chiropractic profession new projects may conflict with projects already in train;

Therefore be it resolved that any chiropractic organization should, prior to the initiation or pursuit of any educational, research, clinical or other chiropractic activity in another country, first contact the World Federation of Chiropractic and its representative for the world region or regions in question, in order to explain the nature of the proposed development, and should maintain communication with the Federation, informing it of progress.
